Authorization for this examiner's amendment was given in a telephone interview with David Morasch on April 28, 2004.

The application has been amended as follows:

--21. (Amended) A method, comprising:

attaching labels for a portable computing device to a foldable label base; the foldable label base being moveable between a first position and a second position, wherein the labels are viewable in the first position and at least some of the labels are concealed from view in the second position; and

attaching the foldable label base to the portable computing device.--

--30. (Amended) A method, comprising:

displaying required labels for an electronic device on a foldable label base; the foldable label base being moveable between a first position and a second position, wherein the required labels are displayed in the first position and at least some of the required labels are concealed from display in the second position; and

attaching the foldable label base to the electronic device.--

2. The following is an examiner's statement of reasons for allowance: In reviewing claims 21 and 30, it was noticed that the step of attaching the label to the device, which limitation
